

## Customized Solutions: Working to Your Specifications

A large part of WEM's success in delivering Essential Skills training solutions is our customized approach to each organization's training needs.

We don't ask you to fit your training needs into a pre-made box.

**We build the box to your specifications.**

We address your unique needs using the hundreds of resources at our disposal and the expertise of our Essential Skills trainers.

## Preparing for Technical Training: Essential Skills for Water/Wastewater Operators

### Who is this course for?

Any Water or Wastewater Operator in Manitoba that needs to write their provincial certification exam.

### What is the course content?

Strategies for studying and writing exams, including:

- Reviewing and practicing math, including multi-step math formulas
- Skimming for key information
- Learning new vocabulary and concepts
- Managing time in order to complete the exam
- Reading questions efficiently during the exam

### What are the benefits?

- Prepares the operator for intensive courses and challenging provincial exams
- Individualized instruction
- Small class size
- Higher rate of success at passing provincial exam
- Ask us about available co-funding
