

# Snapshot Online Assessment

*Snapshot* is an essential skills assessment that identifies a participant's current essential skills and how they transfer to workplace. There is a 3-hour commitment to complete this assessment, however the assessment can be completed in less time.

Participants are introduced to the components of successful workplace performance, focusing on the role of the nine essential skills and personal management basics. An online essential skills assessment is conducted, followed by a debrief between mentor and participant. The debrief session helps participants see the value they will bring to their next employment opportunity.

Participants analyze their assessment results and connect them to their workplace goals.

*A report outlining assessment results is provided to participants and referrers*

## **This online workshop features:**

- Orientation Session
