

SNAPSHOT SKILLS CHECK

The Snapshot Skills Check is a vital tool designed to evaluate and identify a participant's essential skills and their applicability in the workplace.

This Skills Check aims to highlight the participant's potential value to their future employment opportunities. It focuses on the nine essential skills and personal management basics crucial for successful workplace performance.

The Skills Check results are provided in a report to both participants and referrers.

**This Skills
Check
requires a
1 day
commitment**

After the Skills Check, a debrief session is conducted between the mentor and participant to help them understand their results and how they relate to their workplace goals.

This Skills for Success service features an Essential Skills overview, Skills Checks, and a Debrief Session to review your results and possible next steps.

This Skills Check is most beneficial for individuals who have identified a job goal and are preparing for training, demonstrate essential skill readiness for occupational training, and have a recent and sustained work history.
